Dear DOJ Officials:

Please settle the lawsuit as negotiated with Microsoft. We, the people, are tired of all the litigation that goes on in this country. The DOJ and the Attorneys General in the various states should set an example --- and not a "litigious" example. Enough all ready, you made a point and now lets get on with what makes this country great = free enterprise! We need to move more quickly into the tech age and continuous litigation against or within the tech industry is counter productive to a strong, vibrant economy.

Yours truly, John E. Vallance
